***Examiner's Comments***

1. The following Supplemental Notice of Allowance is to correct the inadvertent omission of claims 20 – 23 from the prior Notice of Allowance.

***Reasons for Allowance***

2. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious a magnetic element comprising a nanophase magnetic material meeting applicants' claimed structural and property limitations.

While the prior art of record disclose the general concept of high saturation moment materials comprising nanoclusters, the prior art of record fail teach or render obvious a magnetic material incorporating nanoclusters of a first magnetic material comprising *both* approximately 200 to 800 atoms per nanoclusters and nanoclusters sizes of about 1 nm to about 5 nm, wherein the nanoclusters are surrounded by a second magnetic material. The Examiner notes that there is sufficient evidence of record that a range in atoms of 200 to 800 atoms per nanoclusters would not inherently possess a size of about 1 nm to about 5 nm given that the overall size is determined by the atom types and packing density (i.e. different elemental compositions and different crystal structures will result in different overall nanoclusters sizes for identical atom amounts).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
